MedBuk+
YOUR HEALTH . ALL IN ONE

RECORD · TRACK · SHARE

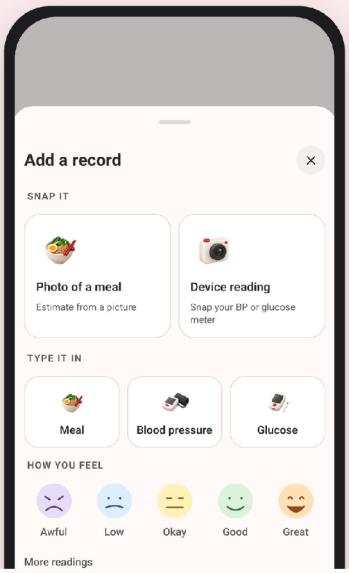

Your private health passport.

MedBuk+ keeps your meals, readings, weight and daily steps together in one place, and lets you decide what you share, and with whom.

01 RECORD

Log in a few taps

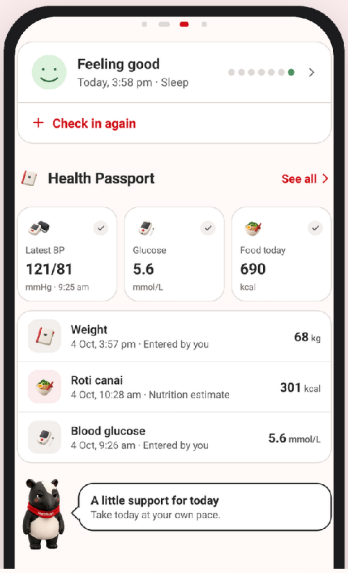

Snap a meal, enter a blood pressure or glucose reading, or note your weight and how you feel.

02 TRACK

See it all together

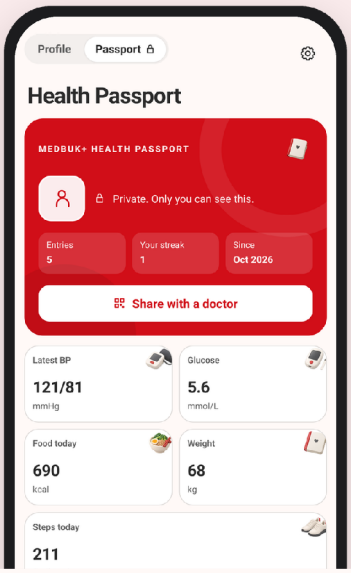

Today shows your steps, latest entries and food in one calm view, with a timeline you can look back on.

03 SHARE

Only when you choose

Your passport is private. Share a record with your doctor or join a challenge only when you decide to.

PRIVATE BY DESIGN

Your health stays yours. Rewards and community are a bonus.

MedBuk+ is built around consent. Nothing is shared unless you say so, and you can change your mind at any time.

Private by default

Your records are visible only to you until you choose otherwise.

You choose what to share

Sharing is opt-in, one decision at a time, and you can stop whenever you like.

Employers see group totals only

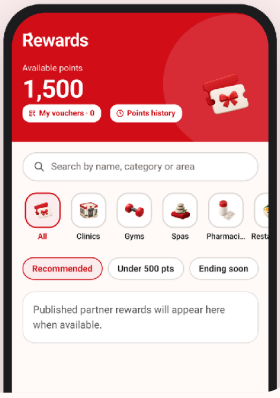

Company programmes show combined figures, never an individual's health records.

REWARDS

1,500 welcome points

Complete your setup and receive a one-time welcome gift of points, then spend them on vouchers from local partners.

- Browse partner offers
- Claim a voucher in the app
- Show it in store

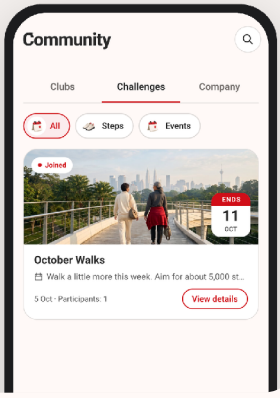

COMMUNITY

Walk together

Take part in step challenges and clubs with friends, colleagues and neighbours.

- Join a challenge
- See how the group is doing
- Your own data stays private
